

WOW

Carrying sheet with 10 handles

WOW injury transportation sheets are devices to be used to move and transport patients in a lying or seated position.

Specific features

- Manufactured with fireproof materials
- Easy to clean thanks to the use of non-absorbent fabrics
- Reinforced nylon webbing to ensure high resistance and durability
- The width of the tape used for the handles, ensures an easy grabbing increasing safety
- On the patient side there are handles dedicated to the patient that make him more collaborative and increase safety
- The special shape, offers high lateral containment during transport
- The supplied adjustable shoulder straps ensure a better distribution of the load on the rescuer
- The longitudinal aluminium rods are removable through the dedicated holes and can be folded into 3 parts. When inserted, they increase the rigidity of the sheet, allowing to distribute the load over a wider surface and allowing to limit the flexion of the device.
- The device also allows the transport of the patient in sitting position
- Requires low storage space

Reference standards

UNI EN 1865-1

Technical data

Length	1870 ± 10 mm
Upper part width	960 ± 5 mm
Lower part width	700 ± 5 mm
Dimensions when stored ⁽¹⁾	500 x 600 x 150 mm
Dimensions of single folded rod	74 x 450 x 30 ± 5 mm
# Handles	10
Strap width	50 mm
Length of upper handles	160 mm
Length of lower handles	260 mm
Rod length	1210 ± 10 mm
Number of side strap adjustments	6
Capacity	150 kg
Weight	4,2 ± 0,2 kg

(1) The measurement refers to wrapped sheets. This is purely indicative, as the device can be folded or wrapped in numerous ways

Class I MD compliant with UE Reg. 2017/745
